Hiring Manager

 Goldman Sachs

Subject: Application for Software Development Internship/Role

Dear Hiring Manager,

I am writing to express my interest in the Software Development Internship Summer Analyst at Goldman Sachs. As a B.Tech Computer Science and Engineering student at Graphic Era Deemed to be University, I have developed a strong foundation in programming, problem-solving, and full-stack development, complemented by hands-on project experience and a proactive learning attitude.

My recent summer internship at ONGC provided me with exposure to real-world software development practices. I have independently built multiple technical projects, including an **Image Classification model for Skin Cancer Detection** using deep learning, a **Notes Management System** with secure authentication, and an **IoT Security Framework** that integrates real-time alerts. These projects demonstrate my ability to combine technical skill with user-oriented design.

I am proficient in C++, Java, Python, JavaScript, and SQL, and have worked with frameworks such as React.js and Node.js. Additionally, my work on a **Mini Compiler** using Lex and Yacc and a **CPU Scheduler Visualizer** reflects my solid understanding of core CS principles.

I am eager to apply my technical and collaborative skills in a challenging environment where I can contribute meaningfully while continuing to learn. I would welcome the opportunity to further discuss how I can contribute to your team. Thank you for considering my application.

Sincerely,
Nikita Darmora
